# Dual Pump Control

A solution that is adaptable, reliable and, easy to use.

---

## Benefits:

- > Robust, UV stable enclosure that will take the hard knocks.
- > Dual pump control with duty cycling.
- > Both pumps will run if high level alarm is reached.
- > Immediate pump changeover if overload is tripped on the operating pump.
- > Auto/Off/Manual control.
- > Lockable cabinet, but status is still visible through transparent door.
- > Bright alarm strobe when overload fault or high level alarm.
- > Extra run dry float safety circuit.
- > Simple, robust components available from any electrical wholesaler.

## Other Options:

- > Soft starter option available for larger pumps
- > Custom made solutions for specialist applications
- > Alarm sounder as well as strobe
- > Bluetooth adjustable time-clock option
- > Spare configurable input for flow or pressure switch
